INVENTORY MANAGER

Welcome to the **_Inventory Management Application_** version 1.1.2. This application uses text files to manage the inventory of systems. The application contains two different users namely: The Admin and Storeman, which are accessed with the correct credentials. Below are the instructions to successfully use the application.

Steps:

- Firstly, press the *"OK"* button on the home page, which will send you to the Login Page.
- Enter the Login details, and then click the *"LOGIN"* Button.

  - ➢ Admin Login details. Username: ***DefaultAdmin@IM***
    Password: ***PasswordA@IM***

  - ➢ Storeman Login details: Username: ***DefaultStoreman@IM***
    Password: ***PasswordSM@IM***

- If the correct Login details are entered, the application will take the user to the page based on the details provided. For example, if the Admin login details were entered the application would take the user to the admin page.
- In the Admin page to add another user click the "***ADD***" button, and then provide the new user's details. To view other Admin accounts click the "***VIEW***" button.
- In the Storeman page, to add another user click the "***ADD***" button, then provide the required details, and to view other saved Storeman accounts the user must click the "***VIEW***" button. To add a product click the "***ADD PRODUCT***" button and add the product Name, Description and Quantity.
- A "***BACK***" button has been included on every page, which returns a user to a previously accessed page.
- To exit The Admin page or the Storeman Page click the "***LOGOUT***" button.

- Lastly on the Login page an "***EXIT***" button has also been included to close the Application.

N.B. The provided Login details above are just primary login details for the application, should the user wish to use HIS/HER own details, then the user can then just add his/her details, if as a Storeman, in the Storeman page or if as an Admin, in the Admin Page. **Thank You!**
